CAREER SUMMARY

QA Lead with **5+ years of experience** in Agile QA environments, specializing in **manual and API testing** with hands-on exposure to **Playwright automation**. Strong at test scenario design, defect management, and cross-functional collaboration, with a solid understanding of **QA fundamentals, SDLC, and continuous improvement practices**.

SKILLS

- **Functional / QA Expertise:**
Manual Testing · Test Scenario Design & Execution · Defect Identification, Reporting & Tracking · Agile & Scrum QA Practices · SDLC · API Testing (Request/Response Validation) · Regression, Smoke, Sanity & Integration Testing · Test Case Authoring · Test Coverage Optimization · Root Cause Analysis · Quality Process Improvement
- **Tools & Technologies:**
Jira · Postman · Swagger · Playwright(JavaScript) · Github Actions · SQL · Git · Browser DevTools · AI Assisted testing using Claude
- **Collaboration & Communication:**
Cross-Functional Collaboration · Clear & Structured Communication · Status Reporting · Problem Solving · Decision Making · Adaptability · Continuous Learning
- **Remote Work:** Virtual Collaboration via Slack · Google Meet · Time management · Document Management

WORK EXPERIENCE

1. QA Lead, The Ninja Studio, Delhi, India(Remote)

March 2024– Present

Ensured end-to-end quality by driving Playwright automation, manual testing, and CI/CD regression to enable fast, stable releases.

Automation Testing & Technical Execution

- Automated **50+** test cases using **Playwright+ JavaScript**, increasing **regression coverage by 30%**
- Built and maintained scalable **Playwright frameworks** using **POM**, improving **reusability by 40%**
- Learning CI/CD regression testing via **Github Actions**, to reduce release **validation time by 35%**
- Executed functional, regression, API, smoke, and sanity testing, improving application **stability by 35%**

Quality Assurance, Collaboration & Leadership

- Identified and tracked **1,000+ defects** in Jira, enabling faster **root-cause analysis and resolution**
- Collaborated with cross-functional teams to deliver **50+ sprint releases** with **zero critical production defects**
- Authored test plans and test cases for new features, achieving **95% test coverage per release**
- Mentored **4+ junior QA engineers** on Playwright and JavaScript automation best practices

2. Software Test Engineer, Guardian Link, Chennai, India

March 2021 - May 2023

Manual QA Engineer with experience testing Web3 applications, smart contracts, and blockchain APIs

Manual Testing & Validation

- Executed end-to-end manual testing of Web3 dApps and smart-contract flows, cutting production **defects by 30%**
- Designed and maintained **400+ manual test** cases covering functional, regression, and exploratory testing
- Validated blockchain **APIs, wallet integrations, and on-chain/off-chain data** integrity across environments

Defect Management & Collaboration

- Logged & tracked **150+ defects** with clear repro steps, improving developer **turnaround time by 25%**

CERTIFICATIONS

- Playwright Modern Automation Testing from Scratch + Framework, Playwright Using JS/TS

EDUCATION

- Bachelor of Engineering(BE), received a degree with distinction from Anna University, Chennai, India
